Reversal Duo

advanced skin resurfacing

Reversal advanced skin resurfacing

An advanced skin resurfacing complex and wrinkle reducer

Resurface the skin without cosmetic surgery. The highly effective UGL Complex and Derm SRC in Reversal facial lotion have shown in clinical studies to naturally stimulate collagen synthesis - vital skin cells are restructured to their maximum capacity.

The main intent of skin care exfoliators is to increase the rate of epidermal skin cell renewal, resulting in improved skin properties including anti-aging effects. Problematic with many exfoliating formulas, such as retinoids, is the increased skin sensitivity. UGL Complex is a *calming* skin exfoliator showing an actual reduction in sensitive skin, delivering multiple long-term benefits without the risk of irritation.

The natural components from marine sources in UGL Complex activate both epidermal and dermal cells resulting in visibly improved cell renewal, increased production of hyaluronic acid and collagen, and increased superficial and integral skin firmness. UGL Complex is one of the most tested anti-aging actives on the market.

Derm SRC uniquely comprises *Bambusa vulgaris* extract, *Pisum sativum* (Pea) extract, and Glucosamine HCL. Bamboo silica - containing over 70% organic silica - stimulates chondroblasts to produce chondroitin and hyaluronic acid providing strength and resilience to collagen and elastin.

Pea extract contains vital amino acids and proteins necessary for the production of collagen and elastin. This extract also reinforces the skin's natural defense in fighting free radicals, helping to prevent new wrinkles from forming. Glucosamine - a natural skin exfoliator - assists in accelerating skin renewal resulting in reduced wrinkles and lines. Working in synergy with bamboo and pea extract, glucosamine assists in increasing the production of collagen and hyaluronic acid; it induces cell proliferation and helps make skin firmer while acting on deeper wrinkles to make them less visible.

Reversal's regenerative formula is also abundant in vitamins and liposomes that further assist skin and capillary repair and offer highly anti-inflammatory properties. Rosehip seed and apricot kernel oils are emollients high in beneficial linoleic, linolenic, and oleic acids, helping to soften and condition rough cellular structures.

Oils of sandalwood, rose, and gardenia contribute cleansing and purifying properties to enhance cellular regulative and regenerative functions while elderberry extract uniquely tones and energizes the skin.

Recommended use: After cleansing and toning, apply a small amount of Reversal Cream to the face and neck or to problem areas, then gently pat a small amount of Reversal Eye Gel under and around eye area; let set until completely absorbed. For those with dry or combination skin, top with your selected daily or nightly moisturizer. To help re-balance extremely dry skin conditions, apply a moisture Masque in the evening, two or three times a week. Clinical studies have shown continued use will increase benefits.

Clinical tests with UGL Complex have shown:

- After two weeks a 33% increase in skin smoothness and 41% to 49% after one month.
- After one month a 32% improvement in diminished lines and wrinkles and 57% after three months.
- After one month a 44% improvement in skin moisture content and 51% after three months.
- After one month a 23% increase in superficial skin firmness due to collagen synthesis and 27% after three months.
- After one month a 13% increase in integral skin firmness and 55% after three months.
- After one month skin clarity increased by 34% and 45% after three months.

Clinical tests with Derm SRC have shown:

- An increase of elastin synthesis by 61%.
- An increase of hyaluronic acid synthesis by 85%.
- In a five-day period an 84.7% increase in exfoliated cells.
- In a four-week period a 45.3% improvement in line and wrinkle reduction.
