

Saw Palmetto

Benign Prostatic Hypertrophy

Saw Palmetto is an effective herbal approach to BPH.

Saw Palmetto has been shown to be useful in the treatment of benign prostatic hypertrophy (BPH). It is approved By German Commission E for this use.

Saw palmetto helps in the treatment of BPH by countering the uptake of androgens into the cells of the prostate. It also inhibits 5 alpha reductase which reduces the conversion of testosterone to DHT. Saw palmetto is also a potent anti-inflammatory which helps reduce the size of the prostate.

Warning: SINCE THE SYMPTOMS OF BPH, PROSTATIC CANCER, AND PROSTATITIS CAN BE IDENTICAL, IT IS EXTREMELY IMPORTANT THAT AN ADEQUATE DIAGNOSTIC EVALUATION BE DONE TO PREVENT DELAYED AND INAPPROPRIATE TREATMENT.
