
Ultra-C 1000

Ultra-C 1000 *is not your usual vitamin C*
How it is Unique:

- This special coated Ascorbic Acid (Vitamin C) is stomach-friendly
- The coating improves stability and taste
- Rutin complements the action of vitamin C
- The coated vitamin C and rutin cost more than plain ascorbic acid, however we feel that the benefits are worth the extra cost.

Ultra-C 1000 Uses:

Vitamin C is a very powerful anti-oxidant, especially in lipid and vitamin metabolism. Of particular interest is its ability to reconstitute Vitamin E and prevent oxidation of tetrahydrofolate.

Vitamin C promotes tissue healing and integrity, enhances immune function, has an antihistamine effect, an antiviral and antibacterial effect. It is required for the production and maintenance of collagen by its part in the synthesis of chondroitin sulfate and the synthesis of hydroxy proline from proline. It plays an active role in the production of neurotransmitters. It is involved in lipid metabolism, particularly in its role in Carnitine synthesis and cholesterol metabolism. It is a component of major drug metabolizing enzyme systems. It is extremely important in wound healing and immune function. It is also important for the eyes and vision.

What is Rutin, and what is it used for?:

Rutin is a flavonol glycoside composed of quercetin and rutinose. It has antioxidant, anti inflammatory, anti carcinogenic, anti thrombotic, cytoprotective and vaso-protective activities.
